801-538-5340

February 8, 1993

Mark Lindsey  
Native Asphalt Company  
136 East South Temple  
Salt Lake City, Utah 84111

Dear Mr. Lindsey:

Re: Water Quality Degradation & Land Survey, Native Asphalt Company, Cameron #1,  
S/047/036, Uintah County, Utah

Thank you for the copy of the results of the PCB testing of the transformer located on your property. The analysis indicates that the transformer contains 2.4 micrograms/milliliter or 2.4 PPM. Our understanding is this transformer is not considered to contain PCB's since the concentration is not equal to or greater than 50 PPM.

To date, the Division has not received information regarding the status or outcome of the land survey of the mine site. Also, the additional information requested which describes mitigation of the water quality degradation has not been received. The land survey was scheduled to take place in June 1992.

Another item which has come to the attention of the Division through correspondence with the BLM involves Native Asphalt's acquisition of properties previously belonging to SOHIO (now BP America). Unreclaimed exploration disturbances have been found on these properties by BLM personnel. For your information, the Division's representative from the attorney generals office has contacted Mr. Richard Frankoski of BP America, to resolve this matter from the state's point of view.

At your earliest convenience, please inform us of the status of the land survey and provide the addition information describing mitigation of the water degradation issue. Please call me if you have any questions regarding this letter.

Sincerely,

Anthony A. Gallegos  
Reclamation Engineer
